PREVIEWKIT

The Infrastructure for Customization

The "Stripe" for Product Customization Previews.
Empowering sellers to scale custom orders with zero manual friction.

The Customization Gap

Manual Workflows

Sellers waste 20–40 minutes per order manually creating mockups in Photoshop.

Communication Chaos

Orders and designs are scattered across WhatsApp, DMs, and email threads.

High Error Rates

Manual design intake leads to incorrect specs, costly reprints, and refunds.

A Broken Process

The loop between buyer imagination and seller delivery is manual, slow, and unscalable.

Introducing PreviewKit

The universal infrastructure layer for real-time product previews.

Instant Visualization

Buyers see their designs on products in real-time, eliminating guesswork and building trust.

Standardized Intake

Structured data replaces messy manual design files, ensuring consistency across orders.

Print-Ready Output

Automated generation of 300 DPI files, ready for production without manual intervention.

How It Works: Upload to Print

1

Upload

Buyer uploads their design (PNG/JPG) via a lightweight, framework-free SDK.

2

Preview

Real-time template-based overlay shows the design on the product instantly.

3

Confirm

Buyer locks the final design, ensuring total confidence before purchase.

4

Deliver

Vendor receives a spec-compliant, 300 DPI print-ready file automatically.

Value for Sellers: Scale Without Friction

40 min

TIME SAVINGS

Save up to 40 minutes per order by eliminating manual mockup creation in Photoshop.

+25%

HIGHER CONVERSION

Instant previews build buyer trust and reduce purchase hesitation, driving higher sales volume.

10x

OPERATIONAL SCALE

Scale your custom order volume without increasing your team size or overhead costs.

Value for Buyers: Trust and Control

"A premium shopping experience that eliminates uncertainty and provides instant gratification."

Instant Gratification

No more waiting for a manual mockup. Buyers see their creation immediately.

Total Control

Buyers can adjust, scale, and perfect their design before committing to the purchase.

Purchase Confidence

Seeing the final product reduces hesitation and significantly lowers return rates.

Cost and Time Efficiency

100% Reduction in manual mockup time.

40min Saved per order on design reviews.

<50KB Ultra-light SDK for instant integration.

Feature	Traditional Way	With PreviewKit
Mockup Creation	Manual Photoshop	**Automated Instant**
File Specs	Variable / Unreliable	**300 DPI Guaranteed**
Buyer Approval	Wait for Email/DM	**Real-time Lock**
Production Errors	Common / Costly	**Eliminated by Design**

Enterprise-Grade Infrastructure

API-First Design

Every feature is accessible via a robust, modern API, allowing for seamless integration into any existing tech stack.

DEVELOPER READY

Template-Driven

Flexible JSON-based templates ensure that no product is hardcoded, supporting any custom product type instantly.

INFINITE SCALE

Multi-Tenant

Isolated environments for every seller from day one, ensuring data security and high-performance reliability.

SECURE BY DEFAULT

Flexible Pricing for Every Stage
